

SLAB LIFTING AND STABILIZATION:

THE MOBILE ZERO EXCAVATION SOLUTION

Stable Soils

The Poly Grout Professionals

PUBLIC OR REMOTE LOCATION? NO PROBLEM!
Stable Soils of Florida fabricated and implemented a highly mobile, two-Part Slab Lifting Pump capable of leveling slabs and filling voids in limited access areas without disrupting normal business operations.

Before (Walkway drop is unsightly and a trip hazard)

After (Just like new with no excavation!)

Benefits of chemical grouting for slab lifting and stabilization:

- **Quick and Easy Process:**
Work can be done in hours/days vs. weeks/months
- **Zero Excavation:** Less Mess and Inconvenience
- **Stabilizes Base and Strengthens Slab**
- **Cheaper Than Replacement**
- **Less Disruptive:** Minimal Loss of Use
- **Risk Mitigation:** Reduce Liability, Business Risk, and Personal Injury Claims From Trip Hazards, Vehicle Hazards, Water Main Ruptures, and Loss of Products.

Stable Soils offers a wide array of products and services to lift concrete and stabilize soil.
